

Black Pearl Digital AG announces operational outlook and revenue forecast

Munich, 09.01.2019 – Black Pearl Digital AG (ISIN: DE000A2BPK34) announces the operational outlook and revenue forecast for the financial year 2019.

In the IT services business segment the company currently focuses on the development of its proprietary software portfolio as well as third-party software development in the fast-growing area of Blockchain-based applications. After the development of its crypto-wallet “SecurePearl” in the first half of 2019, Black Pearl Digital AG plans to actively market the software suite in the second half of the financial year. In addition, first steps have been taking towards the development and marketing of a technical ICO-platform. Apart from marketing this platform as an independent software product, it is the company’s intention to utilise this product as an additional instrument to win clients for its ICO management and consulting business. The company is also confident to secure further clients for third-party software development, i.e. for the development of digital currencies, during the first quarter of 2019.

In its direct investment business segment, Black Pearl Digital AG intends to align its efforts with the financial resources available after the conclusion of the last capital increase. The company will focus on investment opportunities that fit the strategic orientation of its product- and services portfolio.

Based on the current operational development and sales effort, the company expects to achieve revenues of at least EUR 0.5 in the financial year 2019.
